

Tenant Onboarding Guide

Onboarding Objective

Tenant onboarding creates a secure, branded, policy-aligned award nomination environment for a customer organization.

The onboarding process should produce:

- Registered tenant record.
- Tenant domain and branding.
- Entra ID configuration.
- User roster and manager hierarchy.
- Roles for admins, HRBP, PayrollBP, and support.
- Award policy settings.
- Notification templates.
- Optional certificate and payroll configuration.
- Demo or production validation.

Onboarding Checklist

Step	Owner	Output
1. Tenant intake	Customer success/product	Tenant profile and requirements.
2. Identity setup	Tenant admin/platform	Entra app consent and tenant ID.
3. Tenant record	Platform/admin	Tenants row with Azure AD tenant ID and domain.
4. Branding	Tenant/customer success	Logo URL, colors, tagline, site URL.
5. User import	HR/platform	Users rows with manager relationships.
6. Role assignment	Tenant admin/platform	Admin, HRBP, PayrollBP, Support roles.
7. Award policy	HR/product	Currency, min/max amount, categories.
8. Description/integrity policy	HR/risk/product	Word count, semantic thresholds, routing thresholds.
9. Email templates	Customer success	Tenant/language templates.
10. Certificate setup	HR/customer success	Template and config if enabled.
11. Payroll setup	Payroll/platform	Provider, OAuth, webhook, token encryption.
12. Validation	QA/customer success	End-to-end test evidence.
13. Go-live	Tenant sponsor	Production readiness signoff.

Tenant Intake Questions

- Tenant legal/company name.
- Primary domain and award portal hostname.
- Entra tenant ID.
- Locale and supported languages.
- Currency.

- Minimum and maximum award amounts.
- Award categories.
- Manager approval rules.
- HRBP reviewer list.
- Admin list.
- Payroll provider.
- Certificate requirement.
- Notification sender requirements.
- Data retention requirements.
- Reporting/export requirements.

Tenant Configuration

Example `Tenants.Config`:

```
{
  "locale": "en-US",
  "currency": "USD",
  "min_award": 50,
  "max_award": 5000,
  "theme": {
    "primaryColor": "#4f46e5",
    "primaryHoverColor": "#4338ca",
    "primaryLightColor": "#e0e7ff",
    "primaryTextOnDark": "ffffff"
  }
}
```

Description check config should define:

- Minimum word or character count.
- Boilerplate phrases.
- Embedding model.
- Duplicate threshold.
- Category fit threshold.
- LLM review settings.

Integrity config should define:

- Routing score thresholds.
- Graph pattern thresholds.
- Tenant risk tolerance.

User Import Requirements

Each user should include:

- Unique user ID or generated ID.
- `userPrincipalName`.
- `userEmail`.
- First name.
- Last name.

- Title or department.
- Manager ID.
- Tenant ID.

Validation:

- No duplicate UPN/email within tenant.
- No missing manager for eligible beneficiaries unless policy allows.
- No manager cycles.
- Admin, HRBP, PayrollBP, and Support users exist in roster.

Role Assignment

Assign roles:

- **HRBP** for review queue users.
- **PayrollBP** for payroll lookup users.
- **Support** for operational/payroll failure notifications.
- Entra app role **Award_Nomination_Admin** for admin analytics and impersonation.

Branding Setup

Configure:

- Tenant domain.
- Site URL.
- Company logo URL.
- Primary color.
- Hover color.
- Light color.
- Text-on-dark color.
- Tagline.

Validation:

- Public **/api/tenant/branding** returns tenant branding by origin.
- Login page reflects branding.
- Authenticated config applies CSS theme variables.
- Wrong-domain detection behaves as expected.

Award Rules Setup

Configure:

- Currency.
- Minimum award.
- Maximum award.
- Categories, if required.
- Rejection reason policy.
- Certificate behavior.

Validation:

- Frontend displays correct currency and range.
- Backend rejects out-of-range awards.
- Backend requires **CategoryId** when categories exist.

Payroll Setup

For payroll-connected tenants:

- Create **payroll_providers** row.
- Configure provider name and display name.
- Complete provider OAuth onboarding.
- Store encrypted tokens.
- Configure webhook secrets.
- Validate provider webhook route.
- Test employee pay lookup with PayrollBP role.
- Test approved nomination payout path in sandbox mode first.

Go-Live Test Scenarios

Minimum validation:

- Sign in as standard user.
- Submit valid nomination.
- Submit invalid amount and confirm rejection.
- Submit missing category when categories exist.
- Confirm nomination enters **Submitted**.
- Confirm integrity worker routes clean nomination to **Pending**.
- Approver receives email.
- Manager approves.
- Nominator receives outcome email.
- Certificate link works if enabled.
- Payroll submission succeeds or expected sandbox result is recorded.
- HRBP flagged path works.
- HRBP approve continues manager workflow.
- HRBP reject notifies nominator.
- Admin analytics load.
- Admin impersonation is audited.

Post-Go-Live Monitoring

For the first week:

- Monitor login failures.
- Monitor Service Bus dead-letter queues.
- Monitor nomination submission errors.
- Monitor HRBP queue age.

- Monitor email failure rate.
- Monitor payroll failures.
- Review fraud thresholds for false positives.
- Confirm analytics and forecasts populate.
